

Administrator Panel Documentation

System User Guide — Administrator

v 1.0.0

Module	Description	Operations
Employees	Employee management	Add / Edit / Delete
Services	Service management	Configuration
Service Points	Point management	Configuration
Analytics	Statistics and reports	View / Generate
Settings	System settings	Configuration

1 Navigation — Sidebar

After logging in, the administrator sees the main navigation panel. The numbers on the right side indicate the total count of records in the system.

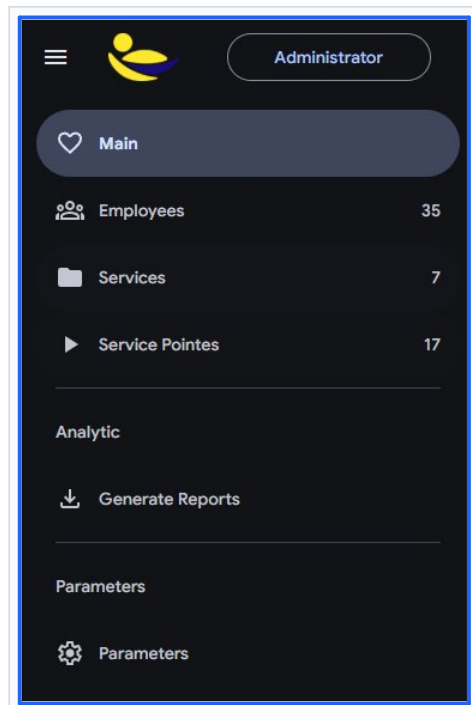

Fig. 1 — Side navigation panel

Module	Description
Home	Main page / Dashboard
Employees	Employee list and management (e.g. 35 records)
Services	Service catalogue (e.g. 7 records)
Service Points	Service points (e.g. 17 records)
Analytics / Report	Statistics and report generation
Settings	System settings management

2 Employees Module

This module allows the administrator to manage all registered employees. Employee types include: doctor, registrator, helper, and others.

2.1 Employee List (Grid)

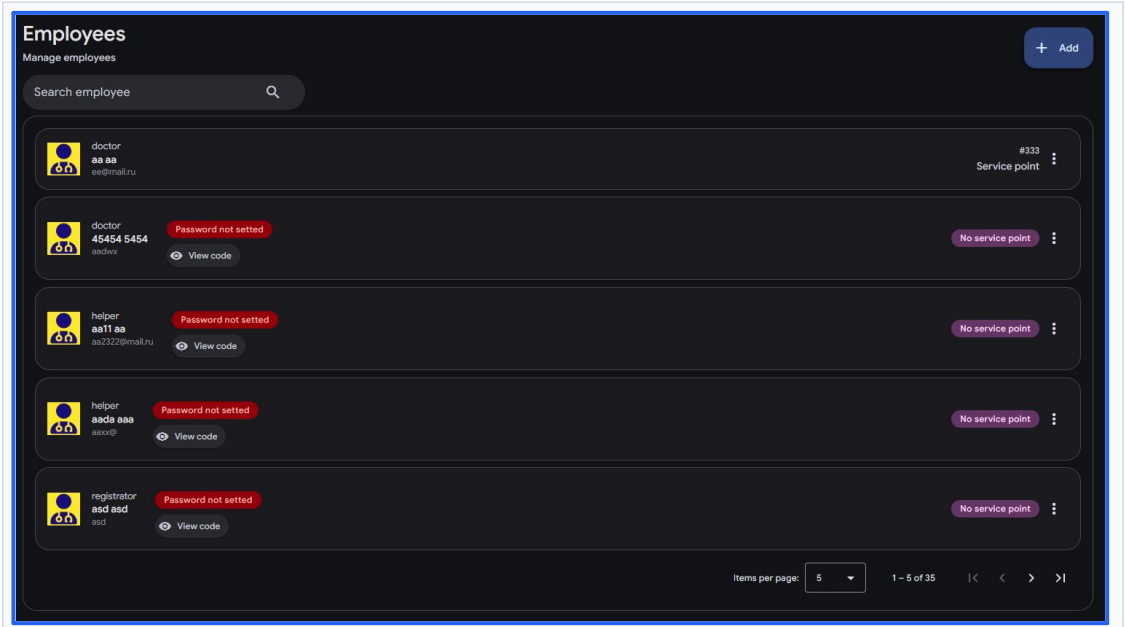

Fig. 2 — Employee list with pagination

[Search] The admin can search the grid by employee first name, last name, or username — the search field is located at the top of the list.

Information displayed for each employee in the grid:

Element	Description
Avatar / Photo	Employee profile picture (yellow icon by default)
First & Last Name	Full name
Email / Username	Contact or login data
Role	doctor / helper / registrator / other
Password status	Red button — "Password not set"
View code	Button — to view the login code
Service point	Service point (#333) or "None"
: Menu	Three-dot context menu

The pagination component is shown at the bottom right of the grid. The admin can change the number of records per page (Items per page) and navigate to any page.

2.2 Add New Employee

Clicking the "Add" button in the top right corner of the grid opens the new employee form.

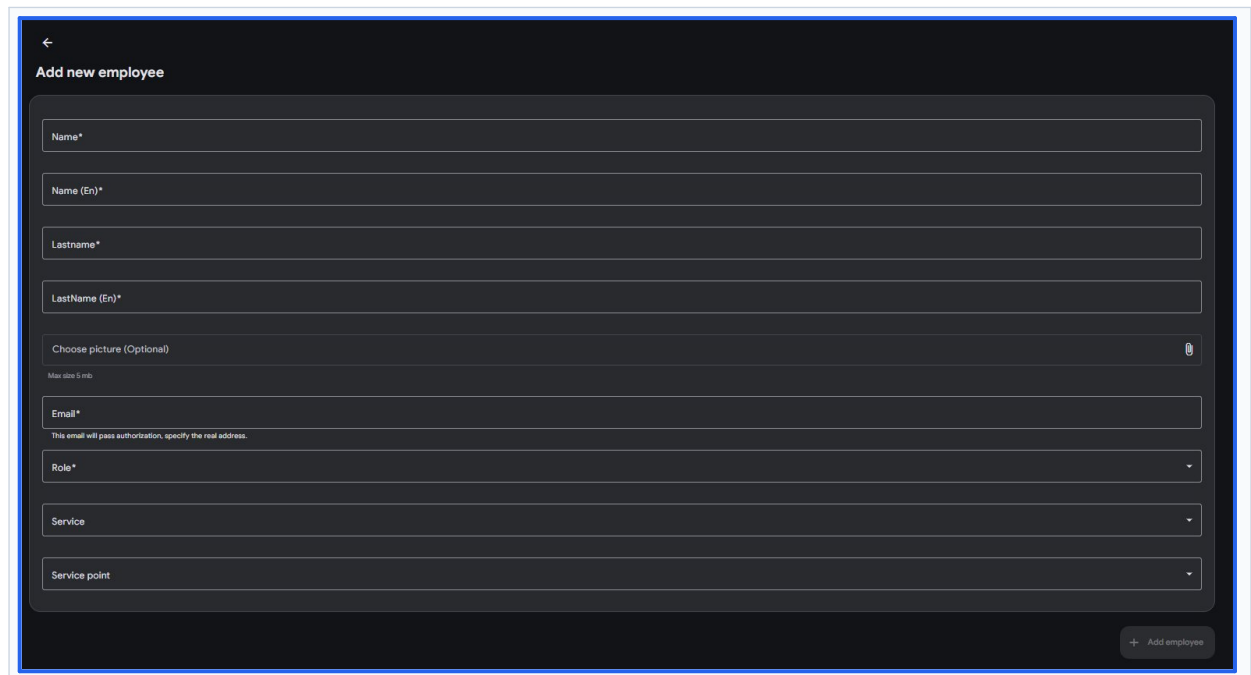

Fig. 3 — New employee form

Form fields:

Field	Type	Status
First name	Text	Required
First name (English)	Text	Required
Last name	Text	Required
Last name (English)	Text	Required
Photo	File (max. 5 MB)	Optional
Email	Text	Required
Role	Dropdown	Required
Service	Dropdown	Optional
Service point	Dropdown	Optional

2.3 Edit Employee

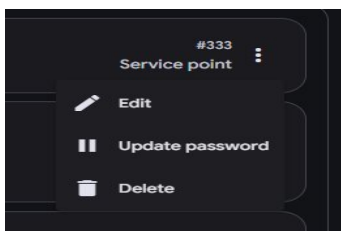

Clicking on an existing record in the grid opens the edit form, showing the employee's current data.

Fig. 4 — Edit employee form

The admin can change any field value including name, surname, email, role, and profile photo. The X button next to a field allows quick clearing.

2.4 Delete Employee / Context Menu

The three-dot  button on the right side of each record shows a context menu with two options.

Action	Result
[Edit]	Opens the edit form
[Delete]	Record is permanently deleted

Fig. 5 — Context menu (Edit / Delete)

3 Services Module

Services are either public or internal. They also help categorise care. Internal services are for staff — e.g. a doctor may be linked to a gynaecology service. Public services, e.g. reception,

are used when visitors collect tickets at a kiosk.

3.1 Service List (Grid)

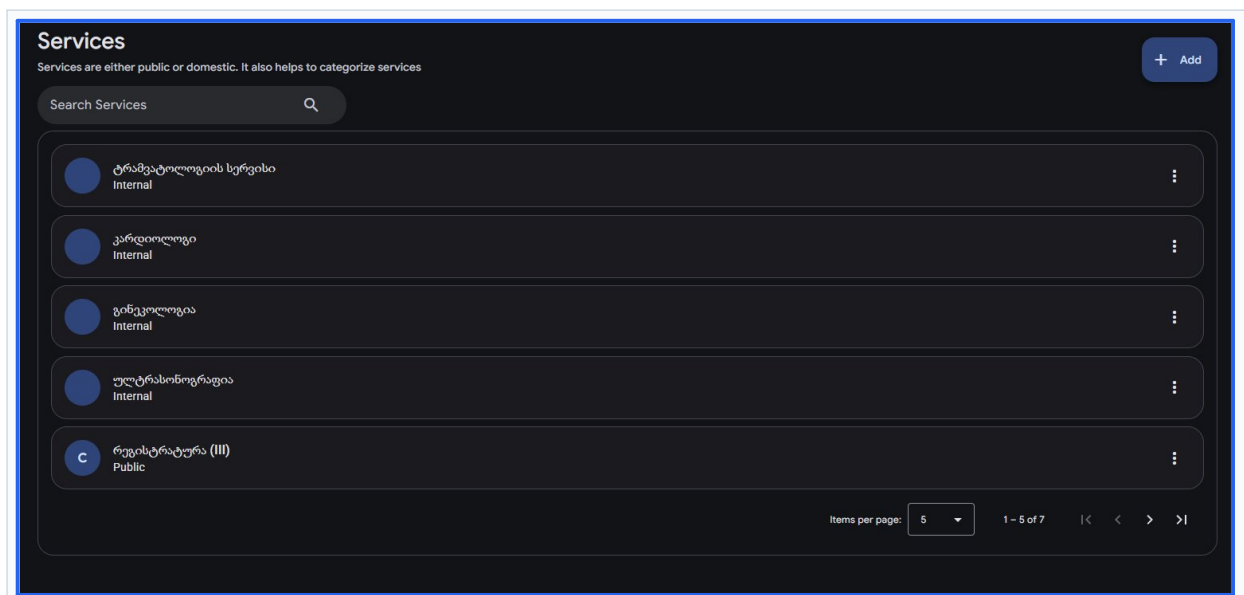

Fig. 6 — Service list

[Search] The admin can search the service list by service name — the search field is at the top of the list.

Element	Description
Name	Service name
Type	Internal — for staff / Public — for kiosk
: Menu	Three-dot context menu (Edit / Delete)

3.2 Add New Service

Clicking the "Add" button in the top right opens the new service form.

←

Add new service

Name (Geo)*

Name (En)*

Name (Ru)*

Service type*

Description (voluntarily)

+ Add service

Fig. 7 — New service form

Field	Type	Status
Name (Georgian)	Text	Required
Name (English)	Text	Required
Name (Russian)	Text	Required
Service type	Dropdown	Required
Description	Textarea	Optional

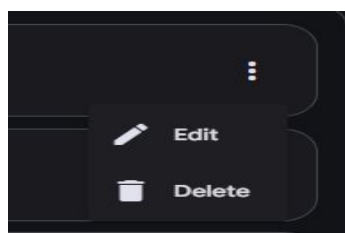

3.3 Edit Service

Selecting "Edit" from the context menu opens the service edit form where any field can be changed.

Fig. 8 — Edit service form

3.4 Delete Service / Context Menu

Clicking the three-dot  button on any service row opens a context menu to edit or delete.

Action	Result
[Edit]	Opens the service edit form
[Delete]	Service is permanently removed

Fig. 9 — Context menu (Edit / Delete)

4 Service Points Module

Service points are used to determine which employee provides care at which location. A service point, like a service, is linked to a specific employee.

4.1 Service Points List (Grid)

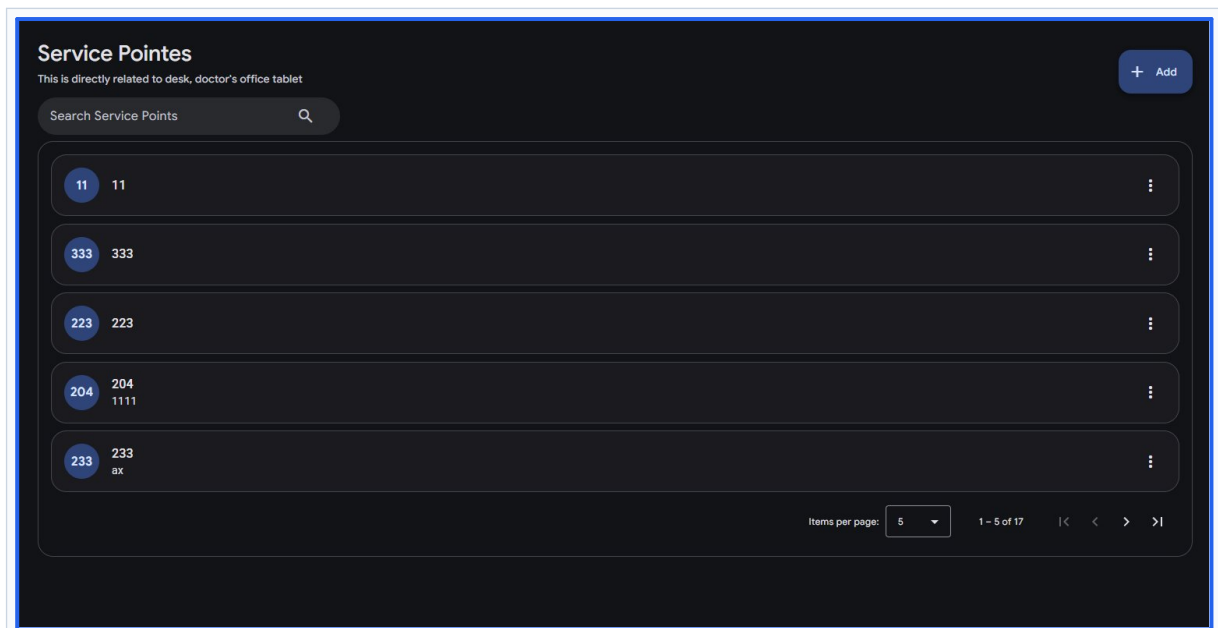

Fig. 10 — Service points list

[Search] The admin can search by service point name — the search field is at the top of the list.

Element	Description
Number	Unique point number (e.g. 11, 333, 223)
Name	Point name / description
: Menu	Three-dot context menu (Edit / Delete)

4.2 Add New Point

Clicking the "Add" button opens the new service point form.

Fig. 11 — New service point form

Field	Type	Status
Number	Numeric	Required
Name	Text	Optional

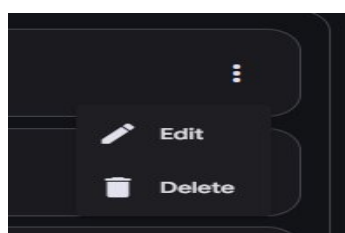

4.3 Edit Service Point

Selecting "Edit" from the context menu opens the edit form. The PIN is also shown — a unique identifier for external devices (e.g. kiosk, tablet).

Fig. 12 — Service point edit form

4.4 Delete Service Point / Context Menu

Clicking the three-dot  button opens a context menu to edit or delete the point.

Action	Result
[Edit]	Opens the point edit form
[Delete]	Point is permanently removed

Fig. 13 — Context menu (Edit / Delete)

5 Notifications Module

When the admin is logged in, a notification button is shown in the header. Notifications are sent by employees — e.g. password reset requests initiated by the user.

5.1 Notification Button (Header)

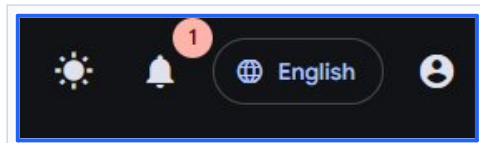

Fig. 14 — Notification button in header (red badge shows unread count)

5.2 Notifications List

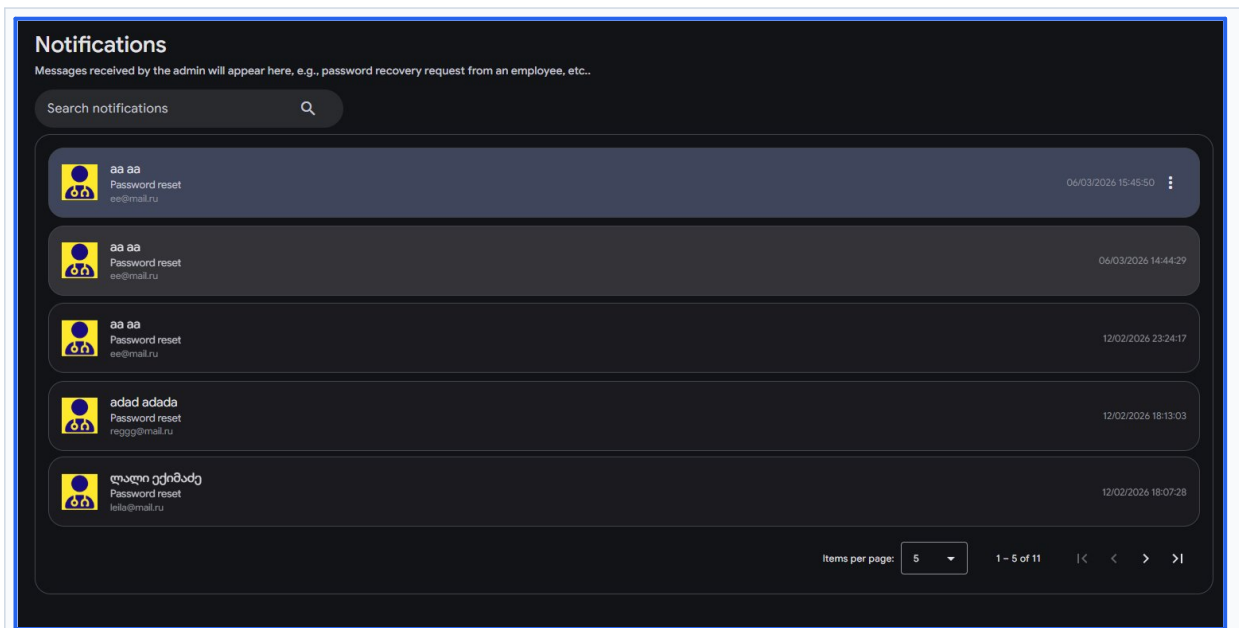

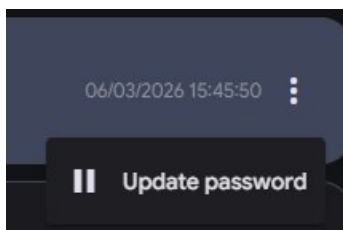

Fig. 15 — Notifications list

Element	Description
Avatar	Employee profile picture
Name	Notification sender
Type	Notification type (e.g. Password reset)
Email	Employee email
Date / Time	Time the notification was received

Notifications can be searched using the search field at the top of the list. Pagination allows browsing all notifications.

5.3 Password Reset from Notification

If the admin has an unanswered notification, clicking the three-dot  button lets them generate a new password for that employee. The generated password is automatically sent to the employee by email.

Action	Result
[Reset password]	A new password is generated and sent to the employee by email

Fig. 16 — Password reset option from context menu
